RESEARCH EXPERIENCE

University of North Carolina at Chapel Hill

Research Intern, advised by **Prof. Huaxiu Yao**

Chapel Hill, NC, USA

Jun. 2024 – Dec. 2024

- Self-evolving framework for preference data generation
 - Introduced a novel framework Anyprefer, which synthesizes high-quality preference data for foundation models, improving alignment with human values across diverse modalities
 - Implemented a cooperative Markov Game-based feedback mechanism to jointly enhance the quality of generated preference data and improve reward estimation accuracy
 - Accepted by *ICLR 2025* as co-first author

SLS Lab, Massachusetts Institute of Technology

Research Intern, advised by **Prof. James Glass** and **Dr. Tianxing He**

Cambridge, MA, USA

Jul. 2022 – Jan. 2023

- Blindspots in PLM-based NLG Metrics

- Revealed the lack of robustness in PLM-based NLG metrics (e.g., BERTScore) and created an evaluation system with synthetic data for comprehensive checks
- Identified biases and flaws in various metrics, proposing solutions to mitigate undesirable behaviors
- Accepted by *ACL 2023*

SDLab, University of California, San Diego

La Jolla, CA, USA

Research Intern, advised by **Prof. Jingbo Shang**

Aug. 2021 – Dec. 2024

- Weakly Supervised Open-world Text Classification
 - Pioneered weakly supervised open-world text classification, revealing limitations of existing methods
 - Proposed WOT-Class, which jointly improves class identification and document classification, achieving an over 20% macro-F1 improvement across datasets
 - Accepted by *CIKM 2023* as first author
- Benchmark for Extremely Weakly Supervised Text Classification
 - Developed a benchmark to compare extremely weakly supervised text classification methods, particularly between representation learning and prompt-based approaches
 - Conducted a thorough analysis of key factors influencing model performance, including dataset characteristics, prompt design strategies, class name and language model selection
 - Accepted by *ACL 2023* as co-first author
